Conserve Energy

Be conscientious about turning off all lights when you're not in the room. We must work together to avoid excessive and unnecessary use of energy. Besides, we save on our utility bills! Your monthly carrying charges include the cost of gas and electricity, so your help in conserving energy is imperative in order to keep **our** utility expenses low. It also helps to use energy-efficient light bulbs, and to purchase energy efficient and/or "Energy Star" labeled appliances.

This is the last regular Co-op Bulletin until September. Separate flyers will be distributed, when necessary. In the meantime, remember to stay informed by reading all the material on your bulletin boards.

Have A Fantastic Summer!
